THE COMMUNITY OUTREACH DEPARTMENT ANNUAL REPORT

FOSTERING ENVIRONMENTAL AWARENESS:

Awareness to Children

On December 5, 2024, our team conducted a Community Outreach Program (COP) titled "Fostering Environmental Awareness: Promoting Sustainability in Schools with Recycled Plastic Brooms" at Dr. Jose G. Tamayo Memorial Elementary School, Brgy. Sto. Niño. This initiative aimed to raise environmental awareness and promote sustainability by teaching students the value of recycling and how to transform plastic waste into usable items, specifically plastic brooms.

Promoting Sustainability in schools with recycled plastic brooms

The preparations for the event began on November 25, 2024, under the leadership of the Overall Chairperson, Jerard Aaron T. Lama. Tasks were carefully delegated to each committee, ensuring teamwork and cooperation for the program's success. As the day of the program approached, materials were gathered by December 4, and the production of the recycled plastic brooms commenced at the Mechanical Engineering Laboratory (Room 229). The Assistance Committee, led by Kristine Dolor, oversaw this preparatory activity, working collaboratively to ensure the materials were ready for the hands-on session with the students.

On the day of the program, the event began with great energy, guided by the emcees, Karl Brent V. Madridano and Sealtiel Sy. Their engaging hosting set a lively tone for the activities. The lecture on environmental awareness, a central part of the program, was delivered by Jelo Dador. His presentation captivated the students, emphasizing the importance of caring for the environment and adopting sustainable practices in their daily lives. Following the lecture, the hands-on activity of making recycled plastic brooms took center stage.

Kristine Dolor and Jasper Paga led this interactive session, demonstrating the step-by-step process to the Grade 6 students.

In the heart of this outreach lies a powerful message: sustainability begins with awareness and action. The “Fostering Environmental Awareness” program not only educated young learners about the urgent need to protect our environment but also empowered them with practical skills to make a difference. By turning plastic waste into something useful, students discovered that change can start with their own hands. This initiative stands as a testament to the impact of united efforts—where a shared vision, guided leadership, and passionate service converge to spark lasting environmental responsibility. As we continue to serve and educate, may this program be a reminder that through simple acts of recycling and awareness, we are building a future that is not only brighter—but greener.

Greener Insights, Safe Future

To conclude the program, small food packs were distributed to the students as a token of appreciation for their participation. The collaborative efforts of everyone involved ensured the program's smooth execution, leaving a lasting impression on the students and the community. Through this Community Outreach Program, we successfully fostered environmental awareness and inspired sustainable practices among the youth. The event showcased the power of teamwork and dedication in achieving meaningful change, reminding us all that even small steps can lead to a cleaner and greener future.
